

**Amendments to the Abstract of the Disclosure:**

Please delete the current Abstract of the Disclosure and insert the following therefor:

A guide assembly for a refrigerated-goods container of a refrigeration device is provided. The guide assembly includes a pair of guide rails for a drawer and the guide rails are mountable on walls of a refrigerated-goods container. The guide rails are mountable on the walls by a compensatory element at an acute angle to the respective wall. The angle is defined such that the rails of the pair run parallel to one another.
